Subject: SH03-6 Issue 3

Bill,

The subject STC for the D205-594 extended height landing gear has been updated to include the 214 models with a restricted takeoff and landing weight of 11,900 lb to satisfy the order for Temsco as Peggy, Mike, and I discussed at HAI. The Limitations are outlined in the new Flight Manual Supplement FMS-D214-594.

Kim, copies of the stamped and signed documents are on their way by Fed-ex. You should have them tomorrow. Please initiate the ECN and FAA application as soon as possible. The letter to Jackey should make reference to the fact that Temsco is waiting for this. Also, please make sure you get the final final documents from Peter as there were some last minute changes to these documents.

David
